

Marta Giamberini is Associate Professor in the Department of Chemical Engineering at Universitat Rovira i Virgili, Tarragona, Spain.

Marta Giamberini got her Master in Chemistry and her PhD in Materials Technology and Industrial Plants from University of Naples "Federico II". Afterwards, she first worked as a post-doc researcher in the Department of Materials and Production Engineering at the University of Naples "Federico II", and subsequently joined the Italian National Research Council (CNR) as researcher. Since 2005 she is Associate Professor in the Department of Chemical Engineering at Universitat Rovira i Virgili, Tarragona, Spain.

She has been working in the field of liquid crystalline polymers for more than 25 years. Currently, her main research interests lie in the field of materials design for specific applications, with a special focus in the field of membranes and microcapsules.

She has co-authored about 100 papers in scientific journals and several book chapters.
